Chromebook Wi-Fi Disconnect/Reconnect Procedure

NOTE: The purpose for this document is to share the procedure for disconnecting and reconnecting the Wi-Fi to help with the installation of apps such as Microsoft Teams.

1. Log into the Chromebook.

2. Click in the “Time and Date” area and the “Settings” to access Wi-Fi.

3. Click on the Wi-Fi icon to access the Wi-Fi access options.
4. Click on the **DCSD.Secure** or **DCSD.Moblit** network (whichever one is connected).
